

Traffic Signal Technician II

DISTINGUISHING FEATURES

The fundamental reason the Traffic Signal Technician II position exists is to perform the installation, maintenance, and repair of signalized intersections, intelligent transportation systems and street lighting equipment in the Field Services Division of the Municipal Services Department. This classification does not supervise. This classification is not designated as supervisory, but has lead worker duties. The Traffic Signal Technician II is a journey level position and distinguished from the Traffic Signal Technician I by the additional experience and skills required and the ability to work independently and provide direction to others. Work is performed under general supervision of the Traffic Signal Supervisor.

ESSENTIAL FUNCTIONS

Performs the construction and maintenance of the City's traffic signals and street lights by installing underground conduit; constructing foundations; and installing poles, mast arms and traffic signal equipment. Installs electrical conductors and makes electrical connections.

Performs routine maintenance by changing bulbs, cleaning lenses and reflectors, and inspecting components; responds to trouble calls and troubleshoots traffic signal control systems; fabricates and installs electrical services, installs vehicle and pedestrian detection systems.

Functions as a lead worker in the absence of the traffic signal supervisor, plans daily assignments and coordinates the efforts of either a construction or maintenance crew.

Operates crane and auger and pulls pole trailer with derrick truck.

Maintains computerized records of traffic signal repairs and preventive maintenance

Operates jackhammers, lift trucks, concrete saws, hoists, cranes, auger truck and bucket truck.

Acts as a team player who works effectively with City staff and citizens.

Attendance and punctuality are essential functions of this position.
